

DATA SHEET

FACET Paddle Mixer Model FMPM

Paddle Mixers are can be used across many industries, but are most commonly used to mix animal feed and related products.

FACET Paddle Mixers consist of a U-shaped horizontal trough fitted with a horizontal longitudinal shaft on which arms are mounted, supporting a combination of paddles set at a fairly close clearance to the trough so that all product is evenly mixed.

The capacity of the paddle mixer should not be exceeded, or this can render the mixer ineffective and result in the product not being adequately mixed.

When considering the model/size of a paddle mixer, the bulk density of the product being mixed must be taken into consideration. Contact our design office directly for further assistance in selecting the paddle mixer best-suited for your mixing and blending requirements.

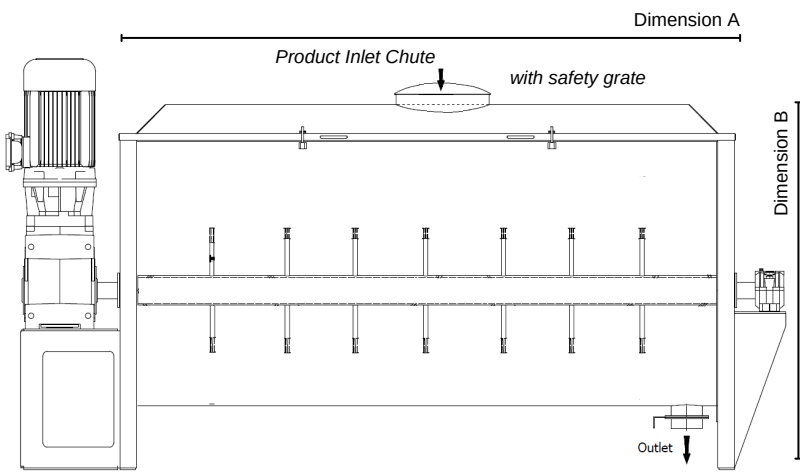

Features include:

- Manufactured in mild steel
- All internal welds ground smooth and polished
- Direct shaft-mounted gearbox
- Hinged stainless steel cover
- Central ingredients access lid with safety grid
- Heavy duty outboard bearings
- PTFE shaft seals (food grade)

(Approximate dimensions)

Model	Capacity	A	B
FMPM-125	125 litre	850mm	700mm
FMPM-250	250 litre	1200mm	875mm
FMPM-500	500 litre	1600mm	1150mm
FMPM-1000	1000 litre	2150mm	1250mm
FMPM-1500	1500 litre	2200mm	1450mm
FMPM-2000	2000 litre	2570mm	1750mm
FMPM-2500	2500 litre	2600mm	1750mm
FMPM-3000	3000 litre	3000mm	1750mm
